

Reflection Assignment

For students studying Leaving Certificate Established Mathematics as part of the Leaving Certificate Applied Programme

I have reflected on my learning in mathematics to date. In particular, I have identified:

topics I have made progress with, and actions I took to help me progress in these topics

topics that I find challenging, and questions I can ask my teacher to help make progress with my learning

suitable next steps I can engage with to help me prepare for my next phase of learning in mathematics.

The reflection can be carried out in any format appropriate for capturing the thoughts of the students.
