

# Junior Cycle Visual Art

Classroom-Based Assessment 1: From Process to Realisation  
Example of Student Work 03

## Strand: **Craft**

## Theme: **My Place**

### **Learning outcomes:**

#### **Students should be able to:**

**2.3** reflect on their own, or another's, craftwork through the use of critical and visual language

**2.4** show they can use their drawings to observe, record and analyse

**2.6** investigate their own personal approach to craftwork through the technical and creative application of drawing and mark-making

**2.7** identify the historical or contemporary skills and materials used in craftworks from a number of different crafts

**1.12** apply their understanding of the art elements and design principles to make an artwork

**2.14** use media to create their own artwork

### **Task**

Following a brainstorming exercise based on the theme the students will develop and realise a lino print from a primary source they have chosen.

### **Time**

7 weeks

### **Background:**

Students learned the skills, materials and processes involved in the designing, making and printing of a series of black and white lino prints on a variety of grounds. Through drawing students identified line, tone, shape and pattern within their primary source and translated it into their prints.

Students showed their understanding and value of the craft, by identifying their favourite or most successful print and, using annotation, explaining their reasons.

Students examined examples of historical and contemporary printmaking in relation to their own processes and work.

The strongest part of the student's lino print is the baby's shoe. It was very well explored by the student in their drawings.

They had developed a very good understanding of the three-dimensional form of the shoe using line. The sudden introduction of the box and tissue paper was where their design came undone. As the student hadn't explored them through their drawings they did not look as three dimensional as the shoe.

It is important for the student to note this and ensure they use their drawing to help them become more familiar with their objects before moving on in the design process.

→ 3 thoughts of this print are:  
1. That they flipped the letter. So when it was printed it came out the right way

2. They used a primary source (In the corridor in the school)

3. I liked that there was black + white white negative space + black for positive space.

↓  
Pic. of my idea for my line.

Tracing with Indian Ink

→ My shaded drawing of my objects.

The student's cutting technique is very well controlled, especially on the shoe outside the box. Their directional cutting really gives the shoe form. However, the shoe inside the box is indicated by a series of marks that create very little structure or definition. The student did analyse the various cuts they could use in their research into Visual Culture but hasn't fully explored it in their work. Changing cutting blades would help them to explore this more.

Käthe Kollwitz: The Mothers, 1923

Where there is white using only thin cuts + a lot of detail

Positive + Negative Space

a lot of black so you fill in the shape

Different directions to short direction

She cut the background so there is no noise

The student could have looked at other examples of other artists' work. For example, some of the German Expressionist printmakers who worked a lot in black and white and made good use of directional line cutting. This would really help the student understand how to bring more structure to their next prints.

cuts to short direction

thin cuts for detail

Black + White  
Black positive space  
White negative space

I chose this line because I thought to shared how to do a line print of a shoe well.

Cuts to short direction

♥ Oliver Lino Prints ♥

F2

I didnt chose this print as my favorite because I didnt think the edges were as clean/straight. Also as there is specks of white in the black. I also didnt chose this because I preferred the flower background.

30

I didnt chose this print because I didnt really like the white ink as it was hard to work and get into the negative space. Also because it is a bit splotchy.

♥ My Favorite Lino Print ♥

o I chose this as my favorite lino print of my picture because I thought I got clean edges on my print. I think that I got it centred. I also loved the background as I think it relates really well to my principal object of my childhood shoe with all the butterflies and flowers. I liked that you could see parts of the butterflies and flowers in the white ♥

## Teacher annotations using the success criteria

The annotations capture observations by the teacher, using the success criteria, with a view to establishing the level of achievement this work reflects. The annotations and judgments were confirmed by a Quality Assurance group, consisting of practising teachers and representatives of the NCCA, the Inspectorate, the State Exams Commission and the Junior Cycle for Teachers support service.

### Teacher annotations:

The strongest part of the student's lino print is the baby's shoe. It was very well explored by the student in their drawings. They had developed a very good understanding of the three-dimensional form of the shoe using line. The sudden introduction of the box and tissue paper was where their design came undone. As the student hadn't explored them through their drawings they did not look as three dimensional as the shoe. It is important for the student to note this and ensure they use their drawing to help them become more familiar with their objects before moving on in the design process.

The student's cutting technique is very well controlled, especially on the shoe outside the box. Their directional cutting really gives the shoe form. However, the shoe inside the box is indicated by a series of marks that create very little structure or definition. The student did analyse the various cuts they could use in their research into Visual Culture but hasn't fully explored it in their work. Changing cutting blades would help them to explore this more.

The student could have looked at other examples of other artists' work. For example, some of the German Expressionist printmakers who worked a lot in black and white and made good use of directional line cutting. This would really help the student understand how to bring more structure to their next prints.

**Overall judgement:**  Above expectations
